### 2016 August Flood LDEQ Incident Command Incident Action Plan (IAP)

Floodwaters are seen on Range Road and I-12 in Denham Springs, Livingston Parish, Louisiana, U.S., August 13, 2016. © Louisiana Department of Transportation and Development / Reuters

Operational Period: Starting: 08:00 / 24 Aug 16 Ending: 08:00 / 25 Aug 16

Single Point of Contact (SPOC)	225-219-3640
Hotline Numbers	-
DEQ	888-763-5424
EPA	866-EPA-SPIL
NRC	800-424-8802
Louisiana State Police (LSP)	225-925-6595

1. Incident Name	ame 2. Operational Period Date / Time									
2016 August Flood	From: 08/24/2016 / 08:00		INCIDENT OBJECTIVES							
2010 August 1 1000	To: 08/25/2016 / 08:00		ICS 202							
3. Incident Objective(s)										
<ol> <li>Ensure health and safety of responders and the p</li> <li>Monitor debris activities at landfills</li> <li>Continue to respond to complaints/concerns from</li> </ol>		the appro	ved site safety plan.							
4. Operational Period Command Emphasis (Prio	rities, Key Decisions for Operational Period)									
<ol> <li>Complete detailed 214s as required, but it is not it.</li> <li>Develop plan for appropriate ICP staff; evaluate at.</li> <li>Reaching out to FEMA/ EPA for assistance with it.</li> <li>Do not put any photographs of flooding and dama.</li> <li>The Incident Command main phone number is (2)</li> </ol>	and provide appropriate "right sizing" of the organiza household hazardous waste, white goods, and orph age on <u>ANY</u> type of social media.	ation to co								
5. Weather Forcast										
Baton Rouge Area: Wednesday, August 24 - 60% ch Thursday, August 25 - 80% chance of thunderstorms h										
6. Safety Objectives										
<ol> <li>reported to the Site Safety Officer.</li> <li>Driving – Be aware of when driving since contra Also be aware that in many areas, red lights are case.</li> <li>Road Hazards - Trucks are loaded with debris a distances, follow the laws, and drive safely.</li> <li>Debris Hazards - Use a tool first when disturbin any operation with the potential to encounter snapoisonous species.</li> </ol>	<ol> <li>Staph infections – due to recent outbreak of severe bacterial infections, all persistent rashes and/or swelling around cuts/abrasions must be reported to the Site Safety Officer.</li> <li>Driving – Be aware of when driving since contractors are coming here to work from other states that are not familiar with Louisiana area roadways. Also be aware that in many areas, red lights are not functioning. Please use appropriate caution when approaching an intersection where this is the case.</li> <li>Road Hazards - Trucks are loaded with debris and may not have the appropriate covering to prevent falling out during transport. Be alert, keep your distances, follow the laws, and drive safely.</li> <li>Debris Hazards - Use a tool first when disturbing debris or overturning containers, and never use your hands. If needed, wear snake chaps during any operation with the potential to encounter snakes. If bitten or stung, seek medical assistance immediately, even if you're certain it wasn't a poisonous species.</li> </ol>

Division / Group	Heavy Equipment	Heat Stress	Electrical	Traffic	Slips/Trips/Falls	Snakes, gators, dogs	Hazardous Materials Operations	Biological	Aerial Overflights	Water Safety	Proper PPE	Communications	Air Monitoring	Personal Hygiene	Radiological	Aerial Overflights	5. Risk Mitigations
Hazardous Debris																	Be aware of heavy equipment. Hydrate. Use care when approaching drums, compressed gas cylinders, and do not attempt handle or open. Watch out for snakes, alligators, and dogs. Min Level D (safety glasses/side shields, watertight boots/steel shanks, hardhats if overhead dangers, gloves, N-95 respiratory protection for dust, mold. Ensure all personnel have emergency contact numbers, appropriate evacuation procedures and training on communication equipment.
Safety Recon		$\boxtimes$			$\boxtimes$						$\boxtimes$			$\boxtimes$			Hydrate. Minimum Level D (safety glasses with side shields, boots with steel shanks, hardhats if overhead dangers, gloves, N-95 protection for dusty conditions. Hearing protection in high noise area. Ensure all personnel have emergency contact numbers, appropriate evacuation procedures and training on communication equipment. Field inspectors should also wear high visibility vests while conducting inspections.
Environmental Assessment		$\boxtimes$			$\boxtimes$						$\boxtimes$			$\boxtimes$			Hydrate. Minimum Level D (safety glasses with side shields, boots with steel shanks, hardhats if overhead dangers, gloves, N-95 protection for dusty conditions. Hearing protection in high noise area. Ensure all personnel have emergency contact numbers, appropriate evacuation procedures and training on communication equipment. Air monitoring, MultiRAE, radiation, etc., if needed
Recon																	Hydrate. Minimum Level D (safety glasses with side shields, boots with steel shanks, hardhats if overhead dangers, gloves, N-95 protection for dusty conditions. Hearing protection in high noise area. Ensure all personnel have emergency contact numbers, appropriate evacuation procedures and training on communication equipment.
Water Operations		$\boxtimes$				$\boxtimes$					$\boxtimes$			$\boxtimes$			Hydrate. Minimum Level D. Be aware of submerged debris and sharp objects that can damage water craft. Watch out for indigenous wildlife. Maintain safe footing when entering and exiting water craft. Be aware for potential downed power lines. Watch for bubbles and unusual odors around gas pipelines. Use only approved Coast Guard personal flotation device (PFDs). Ensure water craft is equipped with CG approved water rescue equipment. Ensure all personnel have emergency contact numbers, appropriate evacuation procedures and training on communication equipment odors around gas pipelines.

Pressurized Containers Removal		$\boxtimes$				$\boxtimes$			$\boxtimes$	$\boxtimes$	$\boxtimes$	$\boxtimes$		Continuously monitor air quality for hazardous atmospheres using a 4 gas monitor with a PID. If leaking containers are encountered, contact hazardous materials personnel for removal. Wear appropriate PPE for the hazards encountered; at a minimum Level D (safety glasses with side shields, boots with steel shanks, hardhats if overhead dangers, gloves, N-95 respiratory protection for dusty conditions. Hearing protection in high noise area. Ensure all personnel have emergency contact numbers, appropriate evacuation procedures and training on communication equipment. If you discover barrels that are bulging at the end or emitting a hissing or whistling sound, evacuate to a safe distance and do not approach or touch.
Heavy Equipment Awareness									$\boxtimes$					Please be aware of all heavy equipment operating in your immediate vicinity. Also be aware of the range of motion and any reverse warning sirens to avoid personal injury from such equipment. Wear high visibility vests and make visual contact with heavy equipment operators so that they are aware of your presence.
Tetanus Immunization		1 1									$\boxtimes$			Tetanus immunizations should be up to date. Please contact Annette Sharpe to determine date last immunized, and region-specific information of who to contact and where to go to receive an immunization shot.
6. Prepared By:	(Na	me a	and l	Posi	tion)									Date Time

IAP SAFETY ANALYIS ICS 215a

Tommy Doran, Safety Officer

The Department is transitioning from search & rescue mode to recovery. During the current operational period the focus will be on Rapid Needs Assessment (RNA), water reconnaissance, and telephone notifications. Personal operating in the field should be aware of ongoing high water risks in many areas. Also, the potential exists for contact with dangerous wildlife (poisonous snakes, alligators, fire ants, etc.) Typical afternoon thunderstorms have the potential for frequent cloud to ground lighting, seek shelter with approaching storms. All staff has Stop Work Authority if the work situation presents unnecessary or undue hazards. As always, report all injuries to the Safety Officer, then clean and disinfect as soon as possible. Be aware of any heavy equipment operating in your immediate vicinity and be sure that heavy equipment operators are aware of your presence by waving and wearing high visibility vests. Tetanus immunizations need to be up to date for all field inspectors. Please contact Annette Sharp for more information. If you come into contact with any barrels that are bulging at the ends or are hissing or whistling because of a pressure release, DO NOT touch them, and immediately evacuate to a safe distance.

08/23/2016

14:00

### **Safety Message**

**2016 August Flood Operational Period:** 08/24/2016/ 0800 08/25/2016 / 0800

#### Major Hazards and Risk:

Defensive Driving, Road Washouts, Debris/Sampling, Electrical hazards, Security, Fatigue, PPE, Heat, Animals

**Tetanus Immunization** – Inspectors going out into the field should be up to date on their tetanus immunizations. If you are unsure of when you had your last tetanus shot, please contact Annette Sharpe. She can verify the date of immunization, and if you need to be immunized, she can provide you with information specific to your region on who to contact and where to go.

**Heavy Equipment Awareness** – Please be aware of any heavy equipment working in your vicinity. Be aware of the equipment's range of movement and any reverse warning sirens. Please stand clear of any equipment in use.

**High Visibilty Vests** – All field inspectors are reminded to wear high visibility colored vests with reflective components during inspections.

**Defensive Driving** - Be alert. Drive with extreme caution. "Watch out for couple of things: 1) twisted or bent stop signs and then other drivers miss seeing the downed signs at intersections; 2) debris on the road like leaning electrical poles and downed power lines. Be aware of service people working in the parishes while driving roads and highways. Be aware of road grade stability that was affected by flooding and roadway washouts.

**Debris/ Sampling:** Wear Appropriate PPE to address the hazard issues while entering and exiting debris fields. Be aware of hollow spaces in debris fields. Remember you can get lacerations from tree trimming. Be aware of potential conditions for fire and explosions. If you are on landfill assessment duty, be sure to check the condition of your vehicles before you leave the facility and get back on the highway.

**Fatigue:** Know your limitations. Watch your buddy. He/She are just as busy as you are. Accidents happen when personnel are fatigued and their thoughts processes are muddled. Physical and mental reaction times become slower. When you are tired and rushing to finish a job, is when a lot of trips, slips, and falls occur. With a loss of power to a lot of homes, people are doing without sleep. Are you one of them?

**PPE**: Personal protective equipment is the first line of defense against injury or potential exposures. All field work requires the minimum of Level D protection.

**Wild Animals** – Please beware that wild animals and insects are being displaced by raising flood waters. These animals are seeking new homes and food. So be aware of snakes, alligators, black bear, raccoon, possums, armadillos, deer, ants, and other stinging insects.

Mosquitoes: WEAR INSECT REPELLANT.

**Hydrate/Heat**: Remember to drink plenty of fluids. Bring something to drink since many facilities have suffered damage and are not open or are without power at this time. Apply sunscreen to exposed skin during prolonged outdoor activities.

Weather Forecast: Heat and heat index listed below in red is for CRO.

Wednesday August 24: Partly cloudy in the morning followed by scattered thunderstorms in the afternoon. High 91F. Winds light and variable. Chance of rain 60%

<u>Thursday August 25</u>: Scattered thunderstorms in the morning, then mainly cloudy during the afternoon with thunderstorms likely. High 89F. Winds E at 5 to 10 mph. Chance of rain 80%.

There are some parishes still experiencing flooding from this event. Please be aware of driving conditions for yourself and the other driver who could hit you if they missed seeing the downed or twisted STOP sign at that intersection. You could be totally right and have the right away and still end up in the hospital. So, protect yourself and those riding with you.

Do not drive cars through flooded areas. Remember....Two feet of rushing water can carry away most vehicles including trucks/pickups. Turn around and don't drown.

Tommy Doran (225) 219-1221 Incident Command Center - HQ LDEQ Safety Officer (225) 938-0086 Cell
